Swimming pools shall comply with the following regulations and requirements:

A swimming pool is defined as:

A Structure either above or below or partly above and partly below grade, located either in part or wholly outside of a permanently enclosed and roofed Building, designed to hold water to a depth of greater than two (2) feet when filled, and intended to be used for swimming purposes.

SWIMMING POOL REQUIREMENTS *(Section 350 of the Spring Lake Township Zoning Ordinance)*

- A. No Swimming Pool (referred to as "pool" in this Section) shall be constructed, erected or installed on any lands in the Township unless a permit therefore has first been obtained from the Township.
- B. The outside edge of the pool wall shall not be located nearer than ten (10) feet to any Lot line. On a Waterfront Lot, a swimming pool shall be fifty (50) feet from the High Water Mark.
- C. Each pool shall be enclosed by a fence or a wall of a height no less than four (4) feet nor more than six (6) feet which is constructed in such manner that no person may enter the Yard or the area where the Pool is located without passing through a gate or door located on the Lot on which the Pool is situated. The fence may be placed on or anywhere inside the Lot lines of the Lot where the Pool is situated; provided, however, that no fence may be erected closer to a Street than a Building may be erected in the Zoning District in which the Pool is located. *Note: A pool safety cover meeting the requirements of the Michigan Residential Building Code may substitute the fence requirement.*
- D. All gates and doors which permit access to the Pool area shall be capable of being locked and shall be locked at all times when no person is present on the Lot on which the Pool is located.
- E. A fence is not required if a Pool cover is installed per the Michigan Building Code, as amended.
- F. For above-ground Pools, steps and ladders to the pool shall be secured and locked, or removed when the Pool is not in use
